

Traveling With Terriers

Top 5 Tips To Position Your RV in a Site with Full Hook-ups

1.

Leave room on the side so you can open all your slides.

2.

Moving a bit forward or back helps make side-to-side leveling a snap.

3.

For fewer accidental spewers, make sure your hose easily reaches the sewer.

4.

Electronics will work no sweat, if you make sure your cord reaches from the RV to the power inlet.

5.

To make sure that water flows, check the distance for the water hose.
